If you are ready to commit attendance, we could say that. Jared and Ron attendance still up in the air.

Thanks Joan.

First sentence of second paragraph is long and missing a word "of".

EPA shares the goal of the Colorado River Basin Ten Tribes Partnership for meaningful engagement with tribes on how EPA's experiences with the Gold King Mine and other legacy mines in the headwaters and other tributaries to the Colorado River can be applied moving forward to ensure the protection **OF** the Colorado River watershed.

The cc's look fine. Should we add Mike Barry, IC, since we will be talking about the response? Also, do we want to say who from EPA is coming, or at a minimum, that I plan to attend?

Shaun, here is the vetted response letter to the Ten Tribes Partnership. The ccs are my addition, so especially looking for your input there. I suggest Alfreda take the lead in reaching out to the Partnership staff contact (Doug B.) to work through agenda details. We can assign TPs to the GKM LT on Thursday based on the topics they identified in their letter.

Betsy is copied here, so she can finalize the letter when you're ready. We can mail the signed version to Vice Chairman Baker and email to Doug B. I will email a cc to the EPA vetters.
